UNIVERSITY PROJECTS

MACHINE LEARNING MODEL TO PREDICT WATER QUALITY LEVELS

May 2024

- The project aims to develop a machine learning model to predict water quality levels, enhancing environmental monitoring and decision-making.
- Implemented an efficient data pipeline using Python and Pandas for data preprocessing and feature engineering.
- Built a scalable ML pipeline with automated ingestion, training & prediction.
- Trained and tested different models as a part of a project exhibition at my university.

FACIAL EMOTION DETECTION AND RECOGNITION

Dec 2024 - Present

- Developed a deep learning system to monitor student focus and detect suspicious behavior.
- Added features like screenshots, teacher alerts, and auto-logout for off-screen activity.
- Integrated into a web app for real-time exam monitoring with a user-friendly interface.
- Strengthened skills in deep learning, model training, and full-stack development.
- Delivered a secure, scalable solution for online exam integrity.
